

SCABIES TREATMENT

Scabies is a benign disease, but it is transmitted through **repeated and prolonged skin-to-skin contact**.

→ Itching, especially at night, and skin lesions

→ I consult my doctor

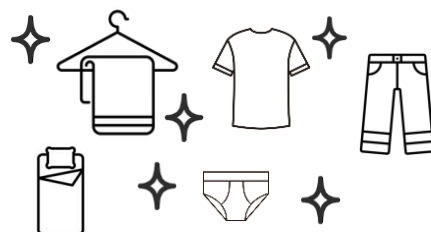

→ **The whole family** takes the treatment prescribed by the doctor

→ I don't eat 2 hours before and 2 hours after

→ I shower the next day (10 hours later)

→ I use clean towels, sheets, and clothes

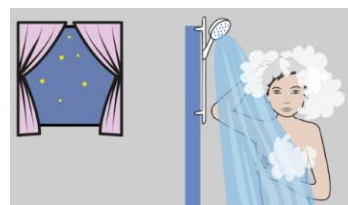

OR

→ I shower before applying the treatment

→ I use clean towels, sheets, and clothes

→ I shower after the delay indicated on the treatment (12 to 24 hours)

60°

OR

3 days

→ I wash the laundry at 60°C or I seal it in a bag for 3 days, I vacuum the fabric furniture

→ **Repeat the treatment after 8 to 14 days**
